

ABSTRACT

A system is provided which is adapted for use with a Lazy Susan (10), having a number of shelves (14) rotatably mounted about a support (16). A series of fins (40) are mounted onto a fin holder (42). Storage containers (44) are located within sector-shaped areas defined by the fins (40). The containers (44) include lids (48) and handle portions (110).
